

Cryogenics

Index to Volume 41 (2001)

No. 1 (January) pp 1-65

No. 2 (February) pp 67-141

No. 3 (March) pp 143-217

No. 4 (April) pp 219-289

Nos. 5-6 (May-June) pp 291-459

No. 7 (July) pp 461-530

No. 8 (August) pp 531-609

No. 9 (September) pp 611-697

No. 10 (October) pp 699-769

Nos. 11-12 (November-December) pp 771-877

Article Index (titles in italics refer to Research and technical notes)

Number 1/January

Control of contact resistance by strand surface coating in 36-strand NbTi CICC's

A. Nijhuis, H.H.J. ten Kate, J.-L. Duchateau and P. Decool 1

Stress/strain dependence of critical current in Nb₃Sn superconducting wires stabilized with Cu-Nb micro-composites - effect of Nb content

K. Kasaba, K. Katagiri, Y. Shoji, T. Takahashi, K. Watanabe, K. Noto, K. Goto, T. Saito and O. Kono 9

Structural safety assessment under the low temperature of KSTAR superconducting magnet-supporting post

N.I. Her, J.W. Sa, S. Cho, C.J. Do, C.H. Choi, B.C. Kim, K.H. Im, M. Kyum, W.C. Kim, G.H. Kim, B.J. Yoo, Y.K. Oh, D.L. Kim, M. Kwon, G.S. Lee and KSTAR Team 15

Static and dynamic scaling experiments on double lap shear specimens at room temperature and at 77 K

P. Rosenkranz, K. Humer, H.W. Weber, D.H. Pahr and F.G. Rammerstorfer 21

Advanced design approach to the high temperature superconducting magnet

Y.-S. Jo, Y.-K. Kim, J.-P. Hong, J. Lee, Y.-K. Kwon and K.-S. Ryu 27

Critical heat flux on a flat plate in pressurized He II

H. Tatsumoto, K. Hata, K. Hama, Y. Shirai and M. Shiotsu 35

Approach to the shape optimization of racetrack type high temperature superconducting magnet using response surface methodology

Y.-K. Kim, Y.-S. Jo, J.-P. Hong and J. Lee 39

Computational study of a 4 K two-stage pulse tube cooler with mixed Eulerian-Lagrangian method

Y.L. Ju 49

Chaotic study of film boiling in superfluid helium

P. Zhang, Y.H. Wu, M. Murakami and R.Z. Wang 59

Number 2/February

Editorial: Workshop on AC Losses

O. Tsukamoto 67

Hysteresis losses in thick YBCO films: a linear component analysis of magnetization in nearly parallel magnetic fields

H. Yamasaki, A. Rastogi and A. Sawa 69

Local calorimetry to measure ac losses in HTS conductors

S.P. Ashworth and M. Suenaga 77

Ramp rate dependence of *E-I* characteristics in Bi2223/Ag HTS tapes

T. Hemmi, T. Okada, A. Ninomiya, T. Ishigohka, K. Arai, H. Yamaguchi, K. Kaiho and K. Kurahashi 91

ac Losses in Bi₂Pb(2223) barrier tapes

G. Witz, M. Dhalle, R. Passerini, X.-D. Su, Y.B. Huang, A. Erb and R. Flükiger 97

Superconducting-magnetic heterostructures as a new method of decreasing transport AC losses in multifilamentary and coated superconductors

B.A. Glowacki, M. Majoros, N.A. Rutter and A.M. Campbell 103

Electromagnetic behavior and ac loss in a multi-layer superconducting power cable

M. Däumling 111

ac Loss analysis for superconducting generator armatures wound with subdivided Y-Ba-Cu-O coated tape

C.E. Oberly, L. Long, G.L. Rhoads and W. James Carr Jr. 117

Study of single dc device type FCL for three-phase power system

T. Nomura, M. Yamaguchi, S. Fukui and K. Yokoyama 125

Analyses for inter-strand coupling loss in multi-strand superconducting cable with distributed contact resistance between strands

K. Seo, K. Fukuhara and M. Hasegawa 131

Erratum 139

Number 3/March

- Magnetoresistance of RuO₂-based resistance thermometers below 0.3 K
M. Watanabe, M. Morishita and Y. Ootuka 143
- Cryogenic treatment to augment wear resistance of tool and die steels
D.M. Lal, S. Renganarayanan and A. Kalanidhi 149
- Magnetization loss calculation in superconducting power transmission cable
J.-k. Lee and G. Cha 157
- Operating properties of superconducting fault current limiters based on YBCO thin films
H.-S. Choi, H.-R. Kim and O.-B. Hyun 163
- Characteristics of HTS tube depending on heat-treatment conditions
Y.-M. Park and G.-E. Jang 169
- Hydrostatic pressure anvil cell for electron transport measurements up to 1 GPa under high pulsed magnetic field at liquid helium temperatures
M. Nardone, A. Audouard, D. Vignolles and L. Brossard 175
- R&D project on superconductor power application technologies
Y. Aiyama and T. Ageta 179
- Design, fabrication and test of a discrete-foil-type superconducting power supply
H.M. Kim, C. Lee, T.K. Ko, Y.S. Yoon, S.-J. Lee, T.-S. Han and S.-S. Oh 189
- Regenerator dynamics in the harmonic approximation II
A.T.A.M. de Waele 195
- Development of forced flow cooled current leads for fusion magnets
R. Heller, S. Fink, G. Friesinger, A. Kienzler, A. Lingor, G. Schleinkofer, M. Süßner, A. Ulbricht, F. Wüchner and G. Zahn 201
- Mechanical behavior of carbon ceramic TVO temperature sensors
M. Süßner and F. Wüchner 213

Number 4/April

- Static stress effects in superconducting composites. Part I. Effect of uniaxial tensile stress on resistive critical field of Cu-Nb composites

V.I. Dotsenko, I.F. Kislyak, V.T. Petrenko, M.A. Tikhonovsky, A.M. Shkilko, L.N. Zagoruiko and L.M. Rogozzyanskaya 219

- Static stress effects in superconducting composites. Part II. Effect of uniaxial tensile and compressive stresses on critical temperatures of Cu-Nb, Cu-NbTi, and bronze-Nb₃Sn composites

V.I. Dotsenko, I.F. Kislyak, V.T. Petrenko, M.A. Tikhonovsky, A.M. Shkilko, L.N. Zagoruiko and L.M. Rogozzyanskaya 225

- The numerical calculation of heat transfer performance for annular flow of liquid nitrogen in a vertical annular channel

S. Sun, Y. Wu and R. Zhao 231

- A proposal of fast self-acting and recovering magnetic shield type superconducting fault current limiter and the analyses of their characteristics

T. Onishi, K.-i. Sasaki and R. Akimoto 239

- Influence of some factors on the damping property of fiber-reinforced epoxy composites at low temperature

P.Q. Zhang, J.H. Ruan and W.Z. Li 245

- AC losses and heat removal in three-dimensional winding pack of Samsung superconducting test facility under pulsed magnetic field operation

Q. Wang, C.S. Yoon, S. Baang, M. Kim, H. Park, Y. Kim, S. Lee and K. Kim 253

- Analytical method for determining critical energies of uncooled superconductors based on the hyperbolic model of heat conduction

M. Lewandowska and L. Malinowski 267

- Quench distribution in superconducting fault current limiters at various voltages

H.-R. Kim, H.-S. Choi, H.-R. Lim, I.-S. Kim and O.-B. Hyun 275

- Single-stage 4-valve and active buffer pulse tube refrigerators

H. Pan, A. Hofmann and L. Oellrich 281

- Measurement of the low temperature electrical properties of solid tantalum capacitors

M. Trainer 285

Numbers 5-6/May-June

Obituary

291

- US Japan Joint Seminar on Innovative Measurement Techniques in Cryogenics held at the National High Magnetic Field Laboratory, Tallahassee, Florida, 3-6 December 2000

S.W. Van Sciver and T. Haruyama 293

- Diagnostics of coolers with oscillating fluid motion Part I. Single diagnostic quantity

Y. Yoshida, K.V. Ravikumar, P. Karlmann and T.H.K. Frederking 295

- Diagnostics of coolers with oscillating fluid motion Part II. Entropy generation

T.C. Chuang and T.H.K. Frederking 299

- Work flow measurements in a thermo-acoustic engine

T. Biwa, Y. Ueda, T. Yazaki and U. Mizutani 305

- A simple method for the analysis of sub-Kelvin refrigerators that use a dilute superfluid ³He-⁴He mixture as a working fluid

F.K. Miller and J.G. Brisson 311

- Measurements of temperature on LHC thermal models

C. Darve and J. Casas 319

- How to measure void fraction of two-phase cryogenic flows

Yu.P. Filippov 327

- Performance of Peltier elements as a cryogenic heat flux sensor at temperatures down to 60 K

T. Haruyama 335

- Measurement devices for cryogenic turbulence research

C.J. Swanson, S.C. Hall and R.J. Donnelly 341

- Techniques for the detection of second sound shock pulses and induced quantum turbulence in He II

D.K. Hilton and S.W. Van Sciver 347

- Helium II level measurement techniques

D. Celik, D.K. Hilton, T. Zhang and S.W. Van Sciver 355

- Kapitza conductance of an oxidized copper surface in saturated He II

A. Iwamoto, R. Maekawa and T. Mito 367

- Advanced ac calorimetric technique for thermal diffusivity measurement at cryogenic temperatures
H. Kato, K. Nara and M. Okaji 373
- Frictional coefficients of structural materials in AC superconducting coils
N. Sekine, T. Takao, T. Shoji, H. Toyama, K. Kashiwazaki, N. Sugawara, K. Nakamura, T. Kashima, A. Yamanaka, M. Takeo and S. Sato 379
- Microampere flux pumps for superconducting NMR magnets Part I: basic concept and microtesla flux measurement
Y. Iwasa 385
- Temperature-dependent AC loss and time constant measurements in high- T_c superconductors
C. Schmidt 393
- Magnetic shielding for sensitive detectors
K. Kamiya, B.A. Warner and M.J. DiPirro 401
- SQUID-based high-resolution thermometer
T.C.P. Chui 407
- Cryogenic contamination speed for cryogenic laser interferometric gravitational wave detector
S. Miyoki, T. Tomaru, H. Ishitsuka, M. Ohashi, K. Kuroda, D. Tatsumi, T. Uchiyama, T. Suzuki, N. Sato, T. Haruyama, A. Yamamoto and T. Shintomi 415
- Application of superfluid shock tube facility to experiments of highly transient low-temperature thermofluid dynamic phenomena
H. Nagai, H.S. Yang, Y. Ueta, M. Murakami, N. Takano and K. Yanaka 421
- Application of laser holography interferometer to heat transport phenomena near the critical point of nitrogen
A. Nakano, M. Shiraishi and M. Murakami 429
- Visualization at cryogenic temperatures using a glass fiber bundle
J.M. Pfotenhauer, M. Ryul Lee and M.L. Corradini 437
- Two-phase visualization at cryogenic temperature
B. Rousset, D. Chatain, D. Beysens and B. Jager 443
- Steady-state pressure drop and heat transfer in He II forced flow at high Reynolds number
S. Fuzier, B. Baudouy and S.W. Van Sciver 453
- Number 7/July**
- Flywheel energy storage system with a horizontal axle mounted on high T_c superconductor bearings
T.H. Sung, J.S. Lee, Y.H. Han, S.C. Han, C.J. Kim, G.W. Hong, S.K. Choi, Y.C. Kim and S.J. Kim 461
- Proposal of saturated DC reactor type superconducting fault current limiter (SFCL)
T. Hoshino, K.M. Salim, M. Nishikawa, I. Muta and T. Nakamura 469
- Effect of welding structure on high-cycle and low-cycle fatigue properties for MIG welded A5083 aluminum alloys at cryogenic temperatures
T. Yuri, T. Ogata, M. Saito and Y. Hirayama 475
- Helium vapor-cooled brass current leads: experimental and analytical results
H. Lee, P. Arakawa, K.R. Efferson and Y. Iwasa 485
- Helium liquefaction with a 4 K pulse tube cryocooler
C. Wang 491
- Numerical calculations for Peltier current lead designing
K. Sato, H. Okumura and S. Yamaguchi 497
- Vickers hardness properties of structural materials for superconducting magnet at cryogenic temperatures
Y. Yoshino, A. Iwabuchi, R. Onodera, A. Chiba, K. Katagiri and T. Shimizu 505
- Thermodynamic analysis of GM-type pulse tube coolers
Y.L. Ju 513
- Peltier cooling of superconducting current leads
F.K. Gehring, M.E. Hüttner and R.P. Huebener 521
- Number 8/August**
- Current limitation based on bulk YBaCuO meanders
E. Floch, D. Buzon, D. Isfort, L. Porcar, X. Chaud, P. Tixador, D. Bourgault and R. Tournier 531
- Development of a 20 kA high temperature superconductor current lead
R. Heller, G. Friesinger, A.M. Fuchs, T. Mito, S. Satoh, K. Takahata, M. Tasca and M. Vogel 539
- Computer-aided design of nitrogen-free helium cryostats
V.V. Eremenko, N.I. Makedonskaya, P.G. Makedonskaya and V.A. Sirenko 549
- Fiber bolometer and emitter with negligible reflection for second sound measurements near the λ -point
D. Rinberg and M.L. Rappaport 557
- Influence of current redistribution on quench propagation velocity in Rutherford cable
K. Sasaki, T. Ogitsu, T. Nakamoto, K. Tsuchiya, T. Shintomi, H. Yonekawa and N. Amemiya 563
- One-dimensional models for heat and mass transfer in pulse-tube refrigerators
W.R. Smith 573
- Analytical studies on the hotspot temperature of cable-in-conduit conductors
K. Yoshida, H. Takigami and H. Kubo 583
- A thermoacoustically driven pulse tube refrigerator capable of working below 120 K
T. Jin, G.B. Chen and Y. Shen 595
- The thermal conductivity of C17510 beryllium-copper alloy below 1 K
A. Woodcraft, R.V. Sudisvala and R.S. Bhatia 603
- A capacitance temperature sensor for the liquid nitrogen region
L. Jansak 607
- Number 9/September**
- Design and loss calculations of a 100-kVA transformer employing multi-filamentary Bi-2223 Ag sheathed superconducting tapes
F. Darmann 611
- Development and testing of superfluid-cooled 900 MHz NMR magnet
H. Nagai, A. Sato, T. Kiyoshi, F. Matsumoto, H. Wada, S. Ito, T. Miki, M. Yoshikawa, Y. Kawate and S. Fukui 623

- Critical current evaluation of BSCCO stacked tapes
W. Nah, J. Kang, B.-S. Kim, M.-C. Shin, J. Joo and J. Yoo 631
- Electrically driven ^4He -circulating dilution refrigerator for cooling aboard spacecraft
S.N. Burmistrov and T. Satoh 637
- General 2D equation for coupling currents in a flat superconducting cable subjected to a time-dependent magnetic field in the face-on orientation
A.A. Akhmetov 649
- Interference characterisation of a commercial Joule-Thomson cooler to be used in a SQUID-based foetal heart monitor
M.R. Bangma, A.P. Rijpmma, E. de Vries, H.A. Reincke, H.J. Holland, H.J.M. ter Brake and H. Rogalla 657
- Stability and quench development study in small HTSC magnet
Yu. A. Ilyin, V.S. Vysotsky, T. Kiss, M. Takeo, H. Okamoto and F. Irie 665
- Fabrication of $\text{YBa}_2\text{Cu}_3\text{O}_{7-x}$ film by metalorganic deposition method using trifluoroacetates and its process conditions
T. Araki, K. Yamaguchi and I. Hirabayashi 675
- Monte-Carlo simulation to the tensile mechanical behaviors of unidirectional composites at low temperature
X.F. Wang and J.H. Zhao 683
- Performance improvement of a pulse tube cooler below 4 K by use of GdAlO_3 regenerator material
L.M. Qiu, T. Numazawa and G. Thummes 693
- Number 10/October**
- Numerical simulation of convergent and divergent tapered pulse tube cryocoolers and experimental verification
H. Yaling, G. Chengming, X. Mingyao, C. Zhongqi and T. Wenquan 699
- Required accuracy of inductance measurement for current imbalance phenomena
S. Yamaguchi, S. Takayama, Y. Hasegawa, A. Ninomiya, K. Nakamura, H. Okumura and R. Shimada 705
- Correlation between J_c and equivalent fracture strain determined by small-punch tests in JN1, JJ1 and JK2 austenitic stainless steels
M.L. Saucedo-Munoz, S.C. Liu, T. Hashida, H. Takahashi and H. Nakajima 713
- AC losses in high-temperature superconducting tapes exposed to longitudinal magnetic fields
N. Magnusson and A. Wolfbrandt 721
- Description of removable sample mount apparatus for rapid thermal conductivity measurements
A.L. Pope, B. Zawilski and T.M. Tritt 725
- AC loss in cored, stabrite-coated, superconducting cables in response to external compaction and variation of core thickness and width
M.D. Sumption, E.W. Collings, R.M. Scanlan, S.W. Kim, M. Wake, T. Shintomi, A. Nijhuis and H.H.J. ten Kate 733
- Low-temperature dielectric properties of doped SrTiO_3 single crystals and valency of ions
N. Kulagin, J. Dojcilovic and D. Popovic 745
- Numerical model of free warm expander pulse tube cooler
M.C. Brito and G.D. Peskett 751
- Experimental analysis of free warm expander pulse tube
M.C. Brito and G.D. Peskett 757
- Eliminating the vibrational noise in continuously filled 1 K pots
A. Raccanelli, L.A. Reichertz and E. Kreysa 763
- Announcement 767
- Numbers 11-12/November-December**
- Structural analysis of a cryogen-free refrigerator for space
M.R. Emes, I.D. Hepburn, R.J. Ray and L.B.C. Worth 771
- The HAWC and SAFIRE adiabatic demagnetization refrigerators
J. Tuttle, P. Shirron, M. DiPirro, M. Jackson, J. Behr, K. Kamiya, B. Warner, E. Kunes and T. Hait 781
- A compact, high-performance continuous magnetic refrigerator for space missions
P. Shirron, E. Canavan, M. DiPirro, M. Jackson, T. King, J. Panek and J. Tuttle 789
- Design and manufacture of ultra-low-mass, cryogenic heat exchangers
A. Boman and D. Doty 797
- Convective heat transfer coefficients for near-horizontal two-phase flow of nitrogen and hydrogen at low mass and heat flux
N.T. Van Dresar, J.D. Siegwirth and M.M. Hasan 805
- Progress on a small multi-cycling cryogenic fluid flow valve
M. Weilert, I. Hahn, M. Barmatz, D. Higham and G. Frodsham 813
- Investigation of technique for measuring liquid volume under micro-gravity conditions
A. Nakano and M. Murakami 817
- Effect of sloshing on the mechanics of dewar systems in low-gravity
H.A. Snyder 825
- An overview of NASA efforts on zero boiloff storage of cryogenic propellants
L.J. Hastings, D.W. Plachta, L. Salerno and P. Kittel 833
- Propellant preservation using re-liquefiers
P. Kittel 841
- Cryocooler reliability issues for space applications
E.D. Marquardt 845
- The effects of cryocooler microphonics, EMI and temperature variations on bolometric detectors
R.S. Bhatia, P.A.R. Ade, T.W. Bradshaw, M.R. Crook, M.J. Griffin and A.H. Orłowska 851
- Performance comparisons of space borne cryostats
W. Holmes, H. Cho, I. Hahn, M. Larson, R. Schweickart and S. Volz 865
- Analysis of helium II thermal links for instrument cooling in low gravity
G.L. Mills 871
- Erratum 877
- Index I
